

Notes on the transcription process

- ▶ The transcription took place between Dec 2015 - June Aug
- ▶ It was manually and checked
- ▶ For each transcription we created a list of observation in order to clarify the main assumptions/clarification made during this process. They are available in each excel files.

Main Data Structure

- ▶ Period: 1493-1539
- ▶ Total Travelers: 19,372
- ▶ Information about the origin: 100 %
- ▶ Information on occupation: 100 %
- ▶ Information on final destination: 95%

Information on Destination (Cities)

Information on destinations

- ▶ **Total destinations:** 621
- ▶ Identified with coordinates: 541 (87.11%)
- ▶ Unclear coordinates: 40 (6.5%)
- ▶ Non-Identified destination : 40 (6.5%)

Identifying unclear destinations

- ▶ Sometimes destination referred to a general places such as country or rivers (e.g. Indias, Tierra Firme). In these cases, when we have information we identify the centroid. Otherwise, we leave this destination to be defined.
- ▶ We use current coordinates. That is, we don't collect information on cities/places that changed location along the time.

Information on Occupation

Mapping occupation into human capital

We found 274 different occupations or social status

Mapping occupation into human capital - Example

- ▶ **Literate:** lawyer, viceroy,
- ▶ **Probably Literate:** major, sheriff, high-rank soldier
- ▶ **Illiterate:** shoemaker, rancher, weaver
- ▶ **Probably Illiterate:** miners, salesperson, low-rank soldier
